

Covibes: The AI Workforce Platform

Karpathy called it. We built it.

December 2024: The tweet that changed everything

Andrej Karpathy

@karpathy

There's a new kind of coding I call "**vibe coding**", where you **fully give in to the vibes**, embrace exponentials, and **forget that the code even exists**. It's possible because the LLMs (e.g. Cursor Composer w Sonnet) are getting too good. Also I just talk to Composer with SuperWhisper so I **barely even touch the keyboard**. I ask for the dumbest things like "decrease the padding on the sidebar by half" because I'm too lazy to find it. I "Accept All" always, I don't read the diffs anymore. When I get error messages I just copy paste them in with no comment, usually that fixes it. The code grows beyond my usual comprehension, I'd have to really read through it for a while. Sometimes the LLMs can't fix a bug so I just work around it or ask for random changes until it goes away. It's not too bad for throwaway weekend projects, but still quite amusing. I'm building a project or webapp, but it's not really coding - **I just see stuff, say stuff, run stuff**, and copy paste stuff, and it mostly works.

We read this. Then built exactly that.

Covibes: The AI Workforce Platform

Multiplayer AI Development

Where teams and AI agents code together, from anywhere, on your infrastructure.

Tromsø, September 2025

What Changed

Remember switching from Word to Google Docs? That's happening to code.
Right now.

Today: AI-Assisted

Human-Driven

Developer must be at their desk.

AI Assists

AI assists one person at a time.

Sequential & Slow

Work is bottlenecked by one person's availability.

Covibes: The AI Workforce Platform

With Covibes: AI Workforce

**Human-Directed**

Fix production from the beach.

**AI Acts**

5 agents working on 5 different tasks.

**Parallel & Fast**

Everything happens at once.

Watch it work

This isn't a concept. We already have a functional version. Watch our AI agents coordinate in shared workspaces with real-time team collaboration.

Covibes: The AI Workforce Platform

AI Adoption

92%

What's really happening:

When a senior developer gets laid off because AI can do 70% of their job, they don't go looking for another job. They realize they can now build an entire SaaS product in a weekend. They grab their designer friend who also got laid off, and maybe a sales person who's tired of selling someone else's dream.

A 3-person team with AI can ship what used to take a 20-person team six months. But here's the catch: these micro-teams need to move at light speed. They're racing against thousands of other micro-teams with the same AI access.

The winners are whoever can prototype, test with users, and iterate the fastest. Every laid-off developer with ChatGPT is now a potential founder. Every downsized team of 3 can now compete with companies of 30. The barrier to starting something has gone from \$100k and 6 months to \$20 and a weekend.

These micro-startups all need the same thing: the ability to build and iterate faster than their competition, as a team. Covibes is the multiplayer development environment for the thousands of new 2-3 person teams emerging from the AI disruption.

Why Flexibility Matters

Who Chooses Self-Hosted

Security-First Enterprises

Your code never touches our servers. Ever.

Regulated Industries

Healthcare, finance, government - meet compliance requirements.

Cost-Conscious Teams

Already have infrastructure? Use it. Already have AI subscriptions? Keep them.

Custom Workflows

Integrate with your existing CI/CD, monitoring, and security tools.

Who Chooses Fully Managed

Covibes: The AI Workforce Platform

Fast-Moving Startups

Sign up. Start coding. 30 seconds.

Small Teams

Focus on building, not managing infrastructure.

Proof-of-Concepts

Test ideas quickly without infrastructure commitment.

Agencies & Consultants

Spin up environments for clients instantly.

Pricing

Choose self-hosted for control, or fully managed for convenience.
