The AI Workforce Platform

From single-player AI assistants to a multi-player AI workforce, managed from anywhere.

Tromsø, September 2025

The Paradigm Shift

Software development is having its "Google Docs" moment. The era of isolated, single-player AI tools is over.

Today: AI-Assisted

👨‍💻

Human-Driven

Developer must be at their desk.

💡

AI Assists

Tools like Copilot provide autocomplete.

⏳

Sequential & Slow

Work is bottlenecked by one person's availability.

With CoVibes: AI Workforce

📱

Human-Directed

PM spawns agents from their phone.

🤖

AI Acts

Agents autonomously fix bugs and build features.

⚡

Parallel & Fast

Multiple tasks are completed simultaneously.

Multi-Agent Collaboration in Action

This isn't a concept. It's a functional platform. See how our AI agents work together in a shared workspace, directed by a human team.

🎥 Watch Demo: Multi-User Collaboration

Two developers working together in real-time with AI agents

▶️ **Play Video**

📱 Watch Demo: Mobile Agent Control

Controlling AI agents from mobile with live preview

▶️ **Play Video**

Parallel Work

Watch Agent A refactor the frontend while Agent B simultaneously updates a backend API.

Real-Time Visibility

The team sees a live feed of all agent progress, code changes, and test results.

Human-in-the-Loop

A developer reviews the combined work and approves the deployment with a single click.

Creating a New Category

We sit at the intersection of three massive trends: AI adoption, remote work, and the need for always-on development cycles.

$26B+
Developer Tools Market

Growing at 25% year-over-year.

100M+
**Developers Worldwide**

70% of whom work in a remote or hybrid model.

92%
Of Developers Use AI

But almost all are using isolated, single-player tools.

Market Size & Potential

Bar chart with y-axis labeled from 0 M/$B/% to 100 M/$B/% and x-axis categories: Dev Tools Market, Global Developers, AI Adoption.

AI Workforce-as-a-Service (WaaS)

A simple, scalable per-user, per-month subscription.

Starter

For small teams getting started.

$15
/ user / month

2 concurrent agents per user

Mobile app access

Basic team visibility

POPULAR

Professional

For growing businesses.

$35
/ user / month

5 concurrent agents per user

Advanced agent coordination

Enterprise integrations

Enterprise

For large-scale needs.

Custom

Unlimited agents

Agent-to-agent collaboration

Advanced security

Building the Future of Development

Our vision is to enable AI development teams that work while you sleep, with humans providing high-level orchestration.

Our Roadmap

Now
Any team member can spawn AI agents with full workspace access.

12 Months
Agents begin to collaborate with each other on complex tasks.

24 Months+
Fully autonomous AI teams managed by human orchestration from mobile devices.

Funding & Use of Funds

- Product & Engineering (60%)
- Go-to-Market (25%)
- Operations (15%)

We are raising funding to hire key engineering and marketing roles in Tromsø, Norway to achieve our 12-month milestones.

The Team

Building the future of AI-powered development from Tromsø, Norway

Eivind Meyer

Machine Learning Developer

Leading the technical development of CoVibes' AI workforce platform, bringing expertise in machine learning and distributed systems.

LinkedIn

Michael Eichelbeck

Strategic Partner, Investor

Bringing strategic guidance and investment expertise to scale CoVibes' vision of autonomous AI development teams.
